

## AI-driven Automation for Enterprise Security and IT Teams

### Scalable nocode, AI-driven automation for SecOps, ITOps, and CloudOps.

#### Solution Benefits

- Enhanced risk visibility for SecOps, ITOps, and CloudOps environments.
- Automate monitoring and incident response across security and IT infrastructure.
- Dynamic policy management with real-time intelligence sharing.
- Faster response times with a centralized risk dashboard for streamlined operations.

Security teams are facing an unprecedented volume of threats, with thousands of alerts daily overwhelming even the most advanced Security Operations Centers (SOCs).

The cost of unchecked alerts and missed threats can be devastating. They lead to breaches that impact 80% of organizations and cost an average of \$4.35 million per incident.

However, with the combined power of Check Point's Infinity Platform and Mindflow's hyperautomation solution, security teams can transform this challenge into an opportunity.

Check Point and Mindflow enable security teams to:

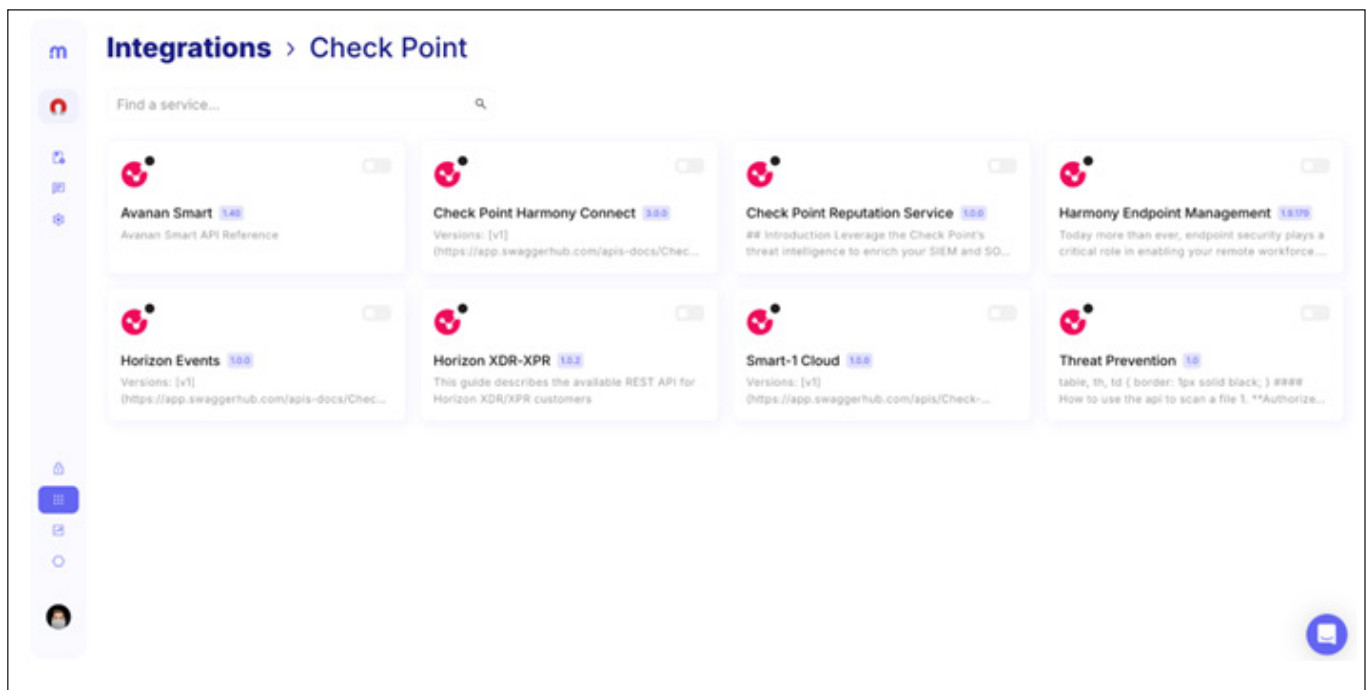

- Automate and accelerate threat detection and response
- Streamline and optimize workflows across all security tools
- Gain real-time visibility and actionable insights
- Reduce human errors and alert fatigue

### Check Point and Mindflow: Augmented AI Powered Threat Prevention

Cyber threats are more sophisticated than ever, and security teams struggle to keep pace. But Check Point and Mindflow offer a new solution. Mindflow's no-code platform integrates effortlessly with Check Point's robust security suite, automating the most time-consuming tasks. Threat detection, investigation, and response are all handled automatically. *No juggling between tools. No coding required.*

AI-powered automation accelerates every step. Alerts are processed instantly, and incidents are triaged without delay. Check Point's industry-leading threat intelligence and Mindflow's automation ensure faster and smarter decision-making.

By automating complex workflows, teams gain greater control and visibility. They act decisively, stop threats early, and stay ahead of attackers. Automation handles the repetitive tasks so teams can focus on what matters—staying secure without the manual overhead.

## Streamline security with Mindflow and Check Point

Mindflow's hyperautomation platform integrates with Check Point's security solutions to deliver a seamless, efficient, and agile approach to threat management. Organizations achieve enhanced threat response and operational efficiency by combining Check Point's advanced security capabilities with Mindflow's automation, AI, and extensive integration ecosystem.

**Enhanced Cloud Security with Check Point CloudGuard:** CloudGuard delivers advanced multi-cloud threat prevention, visibility, and automated policy enforcement. Mindflow amplifies these capabilities by automating security workflows, such as policy updates, threat investigation, and remediation. Leveraging integrations across 700+ tools, Mindflow streamlines cloud security management with actions like enriched alerts through SIEMs (ex., Splunk), ticketing with tools like Jira, alerting with channels like Slack, and automated remediation using AWS services.

**Advanced Endpoint Security with Check Point Harmony Endpoint:** Harmony Endpoint provides comprehensive protection against ransomware and advanced threats. Mindflow complements this by automating response workflows, such as rapid threat isolation, IOC analysis, and coordination with other security tools (like EDRs), ensuring minimal manual intervention and swift remediation.

**Real-Time Threat Intelligence with Check Point ThreatCloud:** ThreatCloud aggregates global threat data for enhanced decision-making and prevention. Mindflow leverages this data to enrich the incident context and automate cross-platform responses. Integrated workflows can cross-reference ThreatCloud IOCs, update network controls, and streamline proactive threat hunting with minimal analyst input.

Mindflow natively integrates with multiple products in the Check Point suite through official APIs. Here's a list of all available integrations:

1. Check Point Avanan Smart
2. Check Point Horizon Events
3. Check Point Threat Prevention
4. Check Point Horizon XDR-XPR
5. Check Point Harmony Connect
6. Check Point Reputation Service
7. Check Point Harmony Smart-1 Cloud
8. Check Point Harmony Endpoint Management

### Better together:

**Automated SecOps and network security:** Accelerate the efficient implementation of your security tool stack. By automating workflows and orchestrating with Check Point Horizon and Harmony platforms, security teams save a lot of analysts' time while managing more security alerts.

**Extend Check Point products' functionality:** Building on Check Point's robust security products, teams can utilize Mindflow's intuitive, no-code platform to integrate with tools from 700+ vendors. This improves cross-platform communication and eliminates operational silos.

**Centralize risk posture view:** Security, Cloud, and IT teams can leverage Mindflow to gain a unified view of all security workflows and risk-related data, combining Check Point's threat intelligence with Mindflow's centralized workflow automation and auditing features.

**Immediate incident response:** Build and deploy event-based workflows that trigger threat detection, triage, ticketing, alerting, and remediation upon events in Check Point. Teams can quickly detect and contain threats, leveraging AI-driven automation to minimize manual intervention and focus on strategic tasks, ultimately strengthening enterprise security.

### About Check Point

Check Point Software Technologies Ltd. ([www.checkpoint.com](http://www.checkpoint.com)) is a leading provider of cyber security solutions to corporate enterprises and governments globally. Check Point Infinity's portfolio of solutions protects enterprises and public organisations from 5th generation cyber-attacks with an industry leading catch rate of malware, ransomware and other threats. Infinity comprises three core pillars delivering uncompromised security and generation V threat prevention across enterprise environments: Check Point Harmony, for remote users; Check Point CloudGuard, to automatically secure clouds; and Check Point Quantum, to protect network perimeters and datacenters, all controlled by the industry's most comprehensive, intuitive unified security management; Check Point Horizon, a prevention-first security operations suite. Check Point protects over 100,000 organizations of all sizes.

### About Mindflow

Mindflow ([www.mindflow.io](http://www.mindflow.io)) is a no-code platform that automates security and IT workflows. Integrating with 700+ tools, Mindflow streamlines processes, reduces response times, and provides real-time visibility. Its intuitive interface empowers teams to create automated workflows without coding, transforming cybersecurity operations with ease and efficiency.
