CHECK POINT™ | **albarius**

Precise, Automated Security Policy Management, Monitoring & Compliance

Solution Benefits

- Seamlessly migrate policies between firewalls and easily transition to the most advanced & secure Check Point products

- Automatically eliminate policy gaps and enhance security & compliance

- Save up to 90% of policy management resources and effort

- Consolidate visibility & controls of your entire managed networks

Insights

Network security policies are the foundations of any cyber defense. However, setting up, managing, and continuously validating or optimizing these policies is oftentimes very tedious. As a result, this important work is oftentimes left undone by operations teams.

This leads to many insecure, inefficient, and suboptimal policies - dramatically increasing network vulnerabilities and making them attack-prone.

Precise Security. Precise Monitoring. Precise Compliance.

Network security professionals across all organizations face a real dilemma with configuring their network policies securely and efficiently.

With policies reaching over 10,000 rules, it is virtually impossible for teams to review & identify risks in real-time. Yet most network security solutions serve their users with too many (at times up to 1,000+ generic insights that don't enhance the network security and due to sheer volume, are simply non-actionable.

Now, Check Point and Albarius present a valuable and innovative joint solution for automating network security policies to enhance security posture and unlock efficiency. **The Check Point & Albarius joint solution embeds a precise, AI-driven network security architect into your network, reviewing and optimizing your policy in real-time 24/7, 365 days a year.** This solution manages an organization's policy lifecycle, eliminating any gaps, enhancing security & compliance – while doing it at a fraction of the time and effort vs. traditional manual approaches.
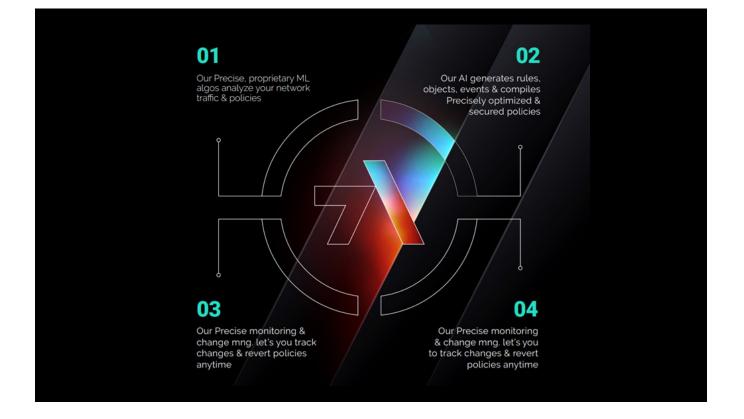

Developed by Albarius to work seamlessly with Check Point products, this solution utilizes proprietary ML & AI algorithms to manage firewall policies, enable organizations to centralize visibility, and facilitate proactive decision-making across the Check Point firewall infrastructure. **Moreover, the unique, built-in comprehensive policy migration tools also enable organizations to easily transition from any vendor to the most advanced and secure Check Point products.**

An Architect's Precise Approach to Network Management and Security

Together, Albarius and Check Point present a solution with a precise, efficient asset-centric approach to completely manage policies and migration between firewalls and different firewall vendors, resulting in highly secure and lean policies while saving up to 90% of time and effort for IT/IS professionals.

Benefits	Impact
Maximize technology investments	Check Point & Albarius joint solution extends your existing Check Point investments with precise policy management that extends performance & lifetime value
Migrate policies seamlessly	Easily transition between firewalls with a one-of-a-kind migration tool, allowing organizations to seamlessly transition from any other vendor and upgrade to Check Point's most secured, advanced products
Save 90% of policy management time and effort	Facilitate Check Point & Albarius joint solution to automate policy management and free your team from tedious policy management. Instead, they can focus their valuable time on reviewing and approving policy optimizations
Eliminate policy gaps and human errors	Enhance network security and compliance by using the joint solution's precise methodology that prevents any human misconfiguration and/or overlooked policy gaps
Avoid legacy methodologies	Keep consistent, coherent polices without old data trails and unused/expired rules and/or issues stemming from different admins with different methodologies

About Check Point

Check Point Software Technologies Ltd. (www.checkpoint.com) is a leading AI-powered, cloud-delivered cyber security platform provider protecting over 100,000 organizations worldwide. Check Point leverages the power of AI everywhere to enhance cyber security efficiency and accuracy through its Infinity Platform, with industry-leading catch rates enabling proactive threat anticipation and smarter, faster response times. The comprehensive platform includes cloud-delivered technologies consisting of Check Point Harmony to secure the workspace, Check Point CloudGuard to secure the cloud, Check Point Quantum to secure the network, and Check Point Infinity Core Services for collaborative security operations and services.

About Albarius

Albarius simplifies network security management. This is where an architect's precision meets AI efficiency. Born from the pains of four veteran network security professionals and entrepreneurs, Albarius is the only platform built BY network admins FOR network admins. Albarius was designed to solve the major issue faced by network security admins: how to continuously and efficiently secure firewalls and policies. With our architect's precision & AI efficiency, our solution configures firewalls to precisely protect the organization according to evolving best practices and the organization's security guidelines. Moreover, we eliminate all security gaps created by different admins with different methodologies, human errors misconfigurations, old data trails, and unused rules/permissions. Follow Albarius on LinkedIn and learn more at www.albarius.io
