Productivity Loss and Cyber Risks in Branch Offices

Today's branch offices are on the frontline, directly interacting with customers and the public. They directly connect the public cloud and internet which expose them to cyber threats. This often makes branch offices a weak link in enterprise network security.

As employees return to the office, they experience downgraded network performance compared to their high-speed home internet. Suddenly, the same bandwidth-hungry SaaS and enterprise apps become frustrating to use at the office due to lag, choppiness, and freeze ups.

Industry-Leading Security

- Next Generation Firewall
- Site-to-Site and Remote Access VPN
- Application and Web Filtering
- Intrusion Prevention
- Antivirus and Anti-Bot
- Advanced DNS Security
- Malware Prevention
- Sandboxing
- Zero-phishing (no agent required)
- HTTPS Inspection (Layer 1-7)

Frontline Defense for the Branch

Secure, Blazing Fast SaaS Apps

The 3970 delivers 4x higher threat prevention throughput compared to previous models. This ensures secure, blazing fast network performance for SaaS productivity apps like Zoom, Teams, Salesforce, etc.

High Speed Connectivity & SD-WAN

The 3970 is SD-WAN ready, 18x 1GbE, 2x 2.5GbE, 8x 1GbE SFP ports and 4x 10GbE connections to support highspeed network in today's hybrid mesh branch networks.

High Performance HTTPS Inspection

While commonly used for good, HTTPS web traffic can also hide illegal user activity and malicious traffic. Enterprises need the ability to inspect a broad range of encrypted TLS 1.3 and HTTPS channels while also excluding inspection of sensitive regulated industry traffic, such as Health Care and Financial. Check Point makes it easy to fine-tune HTTPS security using customizable dynamic security policies.
